EXAMINER'S COMMENT/AMENDMENT/REASONS FOR ALLOWANCE

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 12/21/06 has been entered.

2. All previous rejections have been overcome by the amendment filed on September 8, 2006 and the rejections are withdrawn. ***Claims 1-21, 23-67*** are now pending in the application.

3. The terminal disclaimer filed on September 8, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of application number 10/780,987 and 10/780,996 has been reviewed and is accepted. The terminal disclaimer has been recorded.

4. The IDS filed on 12/21/06 has been considered by the examiner. US patent documents have been initialed by the examiner. However, copending applications and office actions of copending applications cited therein are not deemed as prior art and therefore, are struck off from the IDS. Additionally, an unsigned copy of the initialed IDS filed on 10/21/05 was mailed with the office action dated 3/9/06. A signed copy is attached herewith for applicant's records.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Polly C. Owen on October 18, 2006.

The application has been amended as follows:

Replace entire *claim 12* by " An adhesive composition according to Claim 11 wherein said acrylate monomers are acrylic acid and 2-ethylhexyl acrylate".

Reasons For Allowance

6. *Claims 1-21, 23-67* are allowed.

7. The following is an Examiner's Statement of Reasons for Allowance:

The instant claims are allowable over prior art to Whitmire et al. (US 4,912,169), Martin et al. (US 5,028,484) and Takizawa et al. (US 6,783,850 B2).

The present claims are directed to an adhesive composition comprising at least one acrylic monomer and at least one tackifier resin comprising at least one aromatic monomer and

Art Unit: 1713

at least one acrylate monomer wherein the residual monomer concentration of the tackifier resin is less than about 600 ppm by wt. based on the wt. of the tackifier resin.

Whitmire et al. disclose adhesive compositions comprising a polymeric additive polymerized from acrylic monomers, olefinic acids and optional comonomers wherein said additive has molecular weight less than 35,000 and softening point greater than 40°C. The additive component may be used with polymers or copolymers of styrene, butadiene, ethylene, vinyl acetate, (meth)acrylic acids or esters with (meth)acrylic acids or esters as the preferred species.

Takizawa et al. disclose adhesive compositions comprising 5-75 parts by wt. of an adherent polymer (a) comprising (meth)acrylic ester component as principal structural unit and (b) 5 to 40 parts by wt. of a tackifying resin comprising (meth)acrylic ester component and having a wt. average molecular wt. of 20,000 or less. The tackifier resin include (meth)acrylic esters (column 13, lines 34-40) copolymerized with unsaturated carboxylic acids and aromatic monomers.

Martin et al. disclose adhesives comprising 50-95% acrylic polymer derived from (meth)acrylic ester, polar monomers and optional comonomers, and 5 to 50% by wt. of one or more tackifying resins. The tackifying resins are aromatic resins with a number average molecular wt. of 300-2500, Tg of 40-120°C. The tackifying resin may be grafted with acrylic monomers. Working examples disclose compositions comprising acrylic polymers and acrylic terminated poly(t-but. styrene).

The amended claims recite the limitation with to residual monomer concentration of the tackifier resin as being less than about 600 ppm by wt. based on the wt. of the tackifier resin.

Art Unit: 1713

Such a limitation is not taught or suggested by prior art of record, alone or in combination.

Therefore, the instantly claimed invention is deemed allowable over closest prior art of record as per said art neither anticipating nor rendering, alone or in combination, the instantly claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.
